## Objective

Cybersecurity undergraduate with hands-on experience in full-stack development, network security and CTF competitions. Seeking an internship or entry-level role to apply skills in secure system design, vulnerability assessment, and software development within a dynamic technology environment.

## Education

|                                                                                                                                                                                                                                                 |                                       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|
| <b>Multimedia University (MMU)</b><br><i>Bachelor of Computer Science (Specialization in Cybersecurity)</i><br>– CGPA: 3.00 / 4.00<br>– Relevant Coursework: Network Security, Digital Forensics, Cryptography, Full-Stack Web Development, NLP | Cyberjaya, Malaysia<br>2023 – Present |
| <b>Multimedia University (MMU)</b><br><i>Foundation in Information Technology</i><br>– CGPA: 3.45 / 4.00                                                                                                                                        | Cyberjaya, Malaysia<br>2022 – 2023    |

## Research & Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>GovCare+ – Secure Intelligent Complaint Routing System</b><br><i>React, Firebase, Python, NLP (BERT), Vercel</i> <ul style="list-style-type: none"><li>Built a multilingual government complaint web app (Malay, English, Mandarin, Tamil) using NLP (BERT) to automatically classify and route complaints to the correct department.</li><li>Implemented secure user authentication, real-time database management, and a responsive frontend interface for both citizens and administrators.</li></ul>                            | 2026 |
| <b>NelMora Parfums – E-Commerce Business Website</b><br><i>Next.js, Node.js, Express, PostgreSQL, Stripe, Billplz, Vercel, Railway</i> <ul style="list-style-type: none"><li>Built a full-stack e-commerce website for an independent fragrance brand with SEO-optimised Next.js frontend, Node.js + Express backend, and PostgreSQL database.</li><li>Integrated Stripe and Billplz for real payment processing; deployed on Vercel and Railway with HTTPS, helmet.js, and rate limiting for production security hardening.</li></ul> | 2025 |
| <b>Personal Portfolio Website</b><br><i>HTML, CSS, JavaScript</i> <ul style="list-style-type: none"><li>Designed and built a fully responsive personal portfolio from scratch without frameworks, showcasing projects, technical skills, and professional background with clean UI/UX principles.</li></ul>                                                                                                                                                                                                                            | 2024 |
| <b>Rumah Kucing – Cat Hotel Management Web Application</b><br><i>PHP, MySQL, HTML, CSS, JavaScript, Bootstrap 5, Apache (XAMPP)</i> <ul style="list-style-type: none"><li>Developed a full-stack cat hotel platform with customer and admin modules, including boarding, grooming services, and an online product shop.</li><li>Built secure session-based authentication, role-based access control, and real-time customer profile management with a responsive UI.</li></ul>                                                        | 2023 |

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>NelMora Parfums</b><br><i>Founder (Independent)   Malaysia</i> <ul style="list-style-type: none"><li>Built and operate a small independent fragrance business, managing product development, brand identity, visual design, promotional materials, social media, and business website maintenance.</li><li>Maintained end-to-end business operations including customer engagement and sales strategy.</li><li>Developed and deployed the business website using a production-ready stack: <b>Next.js</b> (frontend), <b>Node.js + Express</b> (backend), <b>PostgreSQL</b> (database), <b>Stripe/Billplz</b> (payments), hosted on <b>Vercel + Railway</b> with HTTPS, helmet.js, and rate limiting for security hardening.</li></ul> | 2025 – Present |

## Honors & Activities

|                                                                                                               |      |
|---------------------------------------------------------------------------------------------------------------|------|
| ICTF 2026 Prep Workshop   Participant – OSINT, Cryptography, Web Exploitation, Reverse Engineering, Forensics | 2026 |
| MY Hack 2025   Participant – Applied offensive security techniques in a competitive CTF-style hacking event   | 2025 |
| Zero to App Flutter Workshop   Participant – Cross-platform mobile development with Flutter                   | 2025 |

## Technical Skills

**Languages:** Python, JavaScript, HTML, CSS, SQL, PHP, Java, C++  
**Frameworks:** React, Next.js, Node.js, Express, Flutter, Python Flask, Firebase Cloud Functions, Bootstrap 5, BERT (NLP)  
**Databases/Platforms:** MySQL, PostgreSQL, SQLite, Firebase, Docker, Vercel, Railway, Apache (XAMPP)  
**Payments/Security:** Stripe, Billplz, HTTPS, helmet.js, rate limiting, session-based auth, role-based access control  
**Cybersecurity Tools:** Kali Linux, Wireshark, OWASP ZAP, StrongSwan, GNS3, VirtualBox, pfSense  
**CTF/Offensive Security:** OSINT, Web Exploitation, Reverse Engineering, Digital Forensics, Cryptography  
**Languages (Spoken):** Malay (Professional), English (Conversational), French (Basic)
